Suppliers of Other Products and Services

12-13 Supplier Codes for Quick Reference & Other Services Provided

14-20-Native Plant Species Index

## INTRODUCTION

The Alberta Native Plant Council shares knowledge and supports the conservation of native plants and native plant habitat in Alberta through outreach, publications and guidelines, stewardship, advocacy, research, and funding and implementing native plant projects.

ANPC maintains and publishes this native plant source list as one of a suite of tools to support the maintenance of native or natural biological diversity in our province.

This tool simply provides a list of potential suppliers, but should not be construed as endorsement for any supplier or specific types of plants, as it is up to the user of this tool to understand how to use it in addition to the other tools that are available for their purposes. Specifically, the Reclamation and Horticulture Committee maintains this tool to

promote the use of native Alberta plants for environmental restoration and for horticultural use such as landscaping and gardening.

ANPC has created other native plant conservation tools such as their series of guidelines that deal with the collection, purchase and use of native plants. These guidelines are the result of extensive consultation with professionals in the areas of conservation, reclamation, and plant production. For additional ANPC guidelines and other references, please visit the Publications webpage of the ANPC's website ([https://anpc.ab.ca/?page\\_id=785](https://anpc.ab.ca/?page_id=785)).

If you have comments, questions or additions regarding the list, requests for informational materials, questions about native plants or habitats, or would like to become a member of our society, please contact the APNC.

Most of our plant material is collected from within the provincial park, salvaged from infrastructure development, or donated to us by our members. While much of it is used for habitat restoration projects, we give away large quantities of seeds and plants for free to anyone willing to grow them. Because we are a small non-profit, most of the harvesting, extracting, planting, etc. is done by our amazing volunteers. The Friends of Fish Creek is always looking for help with our native plant projects so come join us if you're interested!
